Professional Summary

Junior Software Developer with professional experience building enterprise web applications using React.js, TypeScript, Firebase, and REST APIs. Experienced in developing responsive and reusable UI components, integrating APIs, implementing authentication, and working with complex business workflows including HRM, invoicing, inventory, reservations, billing, and document management. Strong foundation in the MERN stack with a focus on clean, maintainable, and user-friendly frontend solutions.

Professional Experience

Junior Software Developer
Edutechs Limited, Dhaka, Bangladesh.
August 20, 2025 – Present

GUSTAV - Frontend Developer
React.js, TypeScript, Firebase, Ant Design

- Developed React.js and TypeScript modules for an enterprise hotel/PMS platform.
- Built HRM, invoicing, inventory, reservation, guest, billing, payment, and reporting workflows.
- Implemented check-in/out, room changes, refunds, payments, and company ledger operations.
- Integrated Firebase Authentication and Realtime Database.
- Created reusable, responsive UI components and optimized frontend workflows for better usability.

DMS - Frontend Developer
React.js, TypeScript, Tailwind CSS, Firebase Authentication, REST APIs

- Developed React.js and TypeScript frontend modules for a Document Management System.
- Built file/folder management features including upload, drag-and-drop, download, copy, move, rename, delete, restore, and trash.
- Implemented search, filtering, sorting, metadata, tags, and custom field management.
- Developed user roles, permissions, document sharing, and audit trail interfaces.
- Created reusable, responsive components and improved UI/UX across complex document workflows.

Technical Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
UI: Ant Design, Shadcn UI, Lucide React, Responsive Design
State & Data: Firebase Realtime Database, Firebase Authentication
Backend & APIs: Node.js, Express.js, REST APIs
Database: MongoDB, Firebase Realtime Database, Supabase
Tools: Git, GitHub, Postman, VS Code
Core: Component Architecture, CRUD, Authentication, Form Validation, API Integration, State Management

Projects

1. Forum Web Application – Community Platform [Live Demo](#) | [Client Repo](#) | [Server Repo](#)

A modern, full-stack discussion platform built using the MERN stack, enabling users to create, discuss, and vote on topic-based posts. Designed for interactive conversations and scalable community management.

2. Gardening Community Website – MERN Stack Platform [Live Demo](#) | [Client Repo](#) | [Server Repo](#)

A full-featured social platform for gardening enthusiasts to connect, share gardening tips, and document their gardening experiences. The platform encourages community interaction and personal profile building.

3. BD Programming – Educational Platform [Live Demo](#) | [Client Repo](#) | [Server Repo](#)

An interactive Bangla-language learning platform that helps beginners gain programming skills through structured courses and hands-on tutorials. Built with the MERN stack.

Education Jan 2021 - Dec 2024

BSc in Computer Science and Engineering (CSE)
Sonargaon University, Dhaka, Bangladesh

Achievements Certificates [Certificate](#)

Participated in Programming Contest on CSE Day 2023 at Sonargaon University.

- Language used: C++
- Solved algorithmic problems as part of the university celebration event.

Languages

Bangla – Native
English – Comfortable
